

What is the output ?

```
func f() (result int) {  
    defer func() {  
        result += 10  
    }()  
    return 5  
}  
  
func main() {  
    fmt.Println(f())  
}
```

```
for i := 0; i < 3; i++ {  
    defer fmt.Print(i)  
}
```

```
a := [3]int{1, 2, 3}  
b := [...]int{1, 2, 3}  
fmt.Println(a == b)
```

```
a := []int{1, 2, 3}  
b := a[:2]  
b = append(b, 99)  
fmt.Println(a)  
fmt.Println(b)
```

```
func change(arr *[3]int) {  
    arr[0] = 100  
}  
  
func main() {  
    a := [3]int{1, 2, 3}  
    change(&a)  
    fmt.Println(a)  
}
```

```
a := []int{1, 2, 3, 4, 5}  
b := a[1:3]  
c := a[1:3:3]  
b = append(b, 10)  
c = append(c, 20)  
fmt.Println(a)  
fmt.Println(b, c)
```

Good Luck 😊
